I certify that I have five years of demonstrated experience in the field of information security, communications security, or computer security, with two of the five years of experience directly involved in analyzing computer system/network vulnerabilities and security risks; AND

I certify that I have 6 months or more of demonstrated experience in at least one of the following areas:

- An understanding of Windows, Unix, or Firewalls
- Experience with conducting and interpreting security scanners (type doesn't matter)
- Experience with conducting and interpreting port scans
- Experience with conducting and interpreting operating system evaluation tools
- Experience with establishing and enforcing security configuration

Please complete page three of the registration packet outlining your experience. Additionally, please attach a 1-4 page summary of your information systems and information security assessment experience.

Your registration packet will not be processed without this information.

I understand this course teaches the Information Security Assessment Methodology (ISAM), not information system security analysis itself. I further understand that completion of this course will not provide expertise nor will it in any way compensate for a lack of analysis or evaluation experience.
