Security Horizon & WetStone to offer Advanced Training via GSA Schedule

Colorado Springs, CO and Cortland, NY – June 26, 2006 – Security Horizon, Inc. and WetStone Technologies have announced the availability of two advanced digital investigation training classes through the Government Services Administration (GSA) Schedule GS-35F-0228P. *LiveWire Investigator*[™] and *Steganography Investigator* are available in either an open or closed enrollment environment, and may be purchased through Security Horizon.

LiveWire Investigator provides high-tech crime investigators, eDiscovery and eCompliance teams with the latest techniques in collecting and examining computers running in “live” networks, thus eliminating the need for costly shutdown and forensic imaging. *Steganography Investigator* instructs students in the latest techniques for investigating advanced data-hiding methods used to covertly communicate, conceal incriminating data, or smuggle sensitive documents by hiding them in harmless looking digital images or audio files. Both classes include hands-on labs and offer a written and practical exam including certification for those who successfully pass. In addition, the fully-licensed versions of all tools used in the classes are provided.

“WetStone Technologies has consistently been on the cutting edge of research and training in this critical area of digital forensics. Security Horizon values this relationship and hopes to increase the availability of WetStone’s incredibly valuable training through the use of our GSA Schedule”, stated Russ Rogers, CEO of Security Horizon.

“Our partnership with Security Horizon is very important to us and has been ongoing for several years now. This offering represents an important next step in both our relationship and our scope. Our ability to work together to deliver advanced high quality hands-on digital investigation training to our U.S. Government customers is critical in our fight against eCrime and Cyber Terrorism,” stated Chet Hosmer, CEO of WetStone.

About Security Horizon, Inc. – Security Horizon, a veteran-owned small business, was founded in 2000 by information security professionals with extensive backgrounds in commercial, United States Government, and Department of Defense (DoD) environments. Security Horizon offerings include security assessments and network vulnerability evaluations, penetration testing, security policy development, and National Security Agency (NSA) INFOSEC training courses and appraisals. Many of our consultants hold high-level security clearances and our experience includes work with the NSA, Defense Information Systems Agency (DISA), United States Navy (USN), and the United States Air Force (USAF). Security Horizon is headquartered in Colorado Springs, Colorado.

About WetStone Technologies, Inc. - WetStone develops eDiscovery, eCrime Investigation and eCompliance software and training for our customers worldwide. WetStone also performs advanced research and development for a broad range of government, law enforcement and private sector organizations.
