Security Horizon Book Launch: Hacking a Terror Network

Colorado Springs, CO – January 3, 2005 – Security Horizon, Inc. is proud to announce the release of “Hacking a Terror Network: The Silent Threat of Covert Channels”, a Syngress Publishing book authored by Security Horizon CEO Russ Rogers.

Covert Channels are broadly defined as information hiding mechanisms; it is anything that may be exploited for secret communication. HTN is a fictional account of an Internet-coordinated terrorist attack on American assets using technology that exists today. The background story draws the reader in and presents the disturbingly real dangers associated with hidden communications. It also includes a CD that contains over 100 tools for creating and detecting hidden messages.

The topic of online terrorist communications was featured in the December 20, 2004 online edition of the New York Times in an article by Tom Zeller Jr., *On the Open Internet, a Web of Dark Alleys*, and concluded with a quote from Russ:

“We’ve become a little bit arrogant,” he stated, “We feel like we created the Internet, that we’ve mastered the network. But we’re not paying attention to how it’s being used to work against us.”

This publication is available through Syngress Publishing, Bookpool.com, Barnes & Noble, O’Reilly & Associates, and Amazon.com.

About Security Horizon, Inc. – Security Horizon, a veteran-owned small business, was founded in 2000 by information security professionals with extensive backgrounds in commercial, United States Government, and Department of Defense (DoD) environments. Security Horizon offerings include security assessments and network vulnerability evaluations, penetration testing, security policy development, and National Security Agency (NSA) INFOSEC training courses and appraisals. Many of our consultants hold high-level security clearances and our experience includes work with the NSA, Defense Information Systems Agency (DISA), United States Navy (USN), and the United States Air Force (USAF). Security Horizon is headquartered in Colorado Springs, Colorado.
