National Security Agency IEM Training Now Available through Security Horizon

Colorado Springs, CO – May 28, 2004 – Security Horizon, Inc. is proud to announce the availability of the National Security Agency's (NSA) INFOSEC Evaluation Methodology (IEM) course. Over the last two years, Security Horizon has worked closely with the NSA to develop this intensive, high quality training course on conducting technical evaluations of customer networks.

The IEM is a hands-on class that provides students with a consistent and reliable methodology for conducting evaluations of customer networks using common technical tools. The process provides each customer with both a roadmap to track and manage findings as well as a metric for measuring improvements in security posture over time.

“Security Horizon is extremely proud of our relationship with the National Security Agency as well as the IEM, which is the outcome of our years of work together,” stated Dr. Greg Miles, President of Security Horizon. “We fully expect this course to be an extremely critical component in the continued education of information security professionals.”

The IEM is a follow on to the popular National Security Agency's INFOSEC Assessment Methodology (IAM), and like this course, students meeting the qualifications will receive NSA certification. Students wishing the NSA certificate must have completed the NSA IAM certificate class and demonstrate at least 6 months of security evaluation tool usage. This course is also open to non-IAM certified individuals on a non-certification basis.

About Security Horizon, Inc. – Security Horizon, a veteran-owned small business, was founded in 2000 by information security professionals with extensive backgrounds in commercial, United States Government, and Department of Defense (DoD) environments. Security Horizon offerings include security assessments and network vulnerability evaluations, penetration testing, security policy development, and National Security Agency (NSA) INFOSEC training courses and appraisals. Many of our consultants hold high-level security clearances and our experience includes work with the NSA, Defense Information Systems Agency (DISA), United States Navy (USN), and the United States Air Force (USAF). Security Horizon is headquartered in Colorado Springs, Colorado.
