Security Horizon Book Launch: Network Security Evaluation

Colorado Springs, CO – August 5, 2005 – Security Horizon, Inc. is proud to announce the release of “Network Security Evaluation: Using the NSA IEM”. This 426-page book offered by Syngress Publishing, was authored by the Security Horizon consulting staff and provides readers with a comprehensive “how to” for conducting technical security evaluations using the National Security Agency’s own methodology. *Network Security Evaluation* made its debut at Black Hat 2005 in Las Vegas, NV.

This is the second in the extremely popular series of information security books aimed at conveying the NSA’s recommended methodology for conducting security assessments and evaluations. Unlike other publications of this genre that focus solely on tools and activities, *Network Security Evaluation* provides a cradle to grave process that results in customized metrics that allow both analysis and trending of a customer’s information security posture. In addition, legislation, regulation, and legal issues are addressed by the former Deputy Legal Adviser to Condoleezza Rice.

This publication (ISBN 1-597490-35-0) is available through Syngress Publishing, Bookpool.com, Barnes & Noble, O’Reilly & Associates, and Amazon.com. It will also be made available to all students attending Security Horizon’s NSA INFOSEC Evaluation Methodology (IEM) course.

About Security Horizon, Inc. – Security Horizon, a veteran-owned small business, was founded in 2000 by information security professionals with extensive backgrounds in commercial, United States Government, and Department of Defense (DoD) environments. Security Horizon offerings include security assessments and network vulnerability evaluations, penetration testing, security policy development, and National Security Agency (NSA) INFOSEC training courses and appraisals. Many of our consultants hold high-level security clearances and our experience includes work with the NSA, Defense Information Systems Agency (DISA), United States Navy (USN), and the United States Air Force (USAF). Security Horizon is headquartered in Colorado Springs, Colorado.
