Syngress Publishing Releases Second Installment of *Stealing the Network*

Colorado Springs, CO – June 15, 2004 – Security Horizon, Inc. is proud to announce the release of “Stealing the Network: How to Own a Continent”, a Syngress Publishing book featuring Security Horizon CEO Russ Rogers as a co-author.

This book is a follow-on to the extremely popular “Stealing the Network: How to Own the Box”, and adheres to the unique format, providing accurate technical information within the context of a fictional novel. It follows the activities of several hackers whose activities are unknowingly coordinated by an anonymous individual to initiate network attacks against various targets in the African continent.

“These authors are easily some of the smartest folks in modern information security,” stated Russ Rogers, CEO and CTO of Security Horizon, Inc. “It was great working with them on this project. The information is provided in a fictional format that will appeal to both the general reader as well as the information security professional. The story is fun to read but still uses real technology the reader can use.”

This publication is available now through Syngress Publishing, Barnes & Noble, Bookpool.com and Amazon.com.

About Security Horizon, Inc. – Security Horizon, a veteran-owned small business, was founded in 2000 by information security professionals with extensive backgrounds in commercial, United States Government, and Department of Defense (DoD) environments. Security Horizon offerings include security assessments and network vulnerability evaluations, penetration testing, security policy development, and National Security Agency (NSA) INFOSEC training courses and appraisals. Many of our consultants hold high-level security clearances and our experience includes work with the NSA, Defense Information Systems Agency (DISA), United States Navy (USN), and the United States Air Force (USAF). Security Horizon is headquartered in Colorado Springs, Colorado.
