Security Horizon Announces eEye® Digital Security Partnership

Colorado Springs, CO – September 30, 2004 – Security Horizon, Inc. is proud to announce a training partnership with eEye® Digital Security, a leading developer of security software. Security Horizon, author and provider of the National Security Agency’s INFOSEC Evaluation Methodology (IEM), has selected eEye’s Retina® Network Security Scanner as a part of the toolset demonstrated and utilized in this hands-on technical training course.

“Security Horizon’s success in offering this long-anticipated training is due, in part, to partnering with companies that offer excellent quality products that assist us in the teaching of our technical courses,” stated Ed Fuller, Executive Vice President of Security Horizon, Inc. “Although we will continue to be vendor neutral in order to provide the best educational experience for our students, we are certainly pleased to be working with a company of eEye’s caliber.”

All Security Horizon students will have the opportunity to become familiar with eEye’s Retina product as well as other network security tools as part of the IEM, recently approved and released by the National Security Agency.

About eEye Digital Security

eEye Digital Security is a leading developer of security software and an active contributor to network security research and education. eEye provides complete vulnerability management solutions that address the full lifecycle of security threats: before, during, and after attacks. eEye’s award-winning products include vulnerability assessment, remediation management, intrusion prevention and network forensics solutions. eEye protects the networks and digital assets of more than 2,500 corporate and government entities in over eighty countries, including AT&T Wireless, Avon, Citigroup, Continental Airlines, US Department of Defense, Dow Jones, Ernst & Young, Prudential, Viacom and Wyeth. Founded in 1998, eEye is a privately held, venture-backed firm with headquarters in Orange County, Calif. For more information visit www.eeye.com.

About Security Horizon, Inc. – Security Horizon, a veteran-owned small business, was founded in 2000 by information security professionals with extensive backgrounds in commercial, United States Government, and Department of Defense (DoD) environments. Security Horizon offerings include security assessments and network vulnerability evaluations, penetration testing, security policy development, and National Security Agency (NSA) INFOSEC training courses and appraisals. Many of our consultants hold high-level security clearances and our experience includes work with the NSA, Defense Information Systems Agency (DISA), United States Navy (USN), and the United States Air Force (USAF). Security Horizon is headquartered in Colorado Springs, Colorado.
