

Greetings folks,

We know you haven't heard much from us in the last few months about training and we want to let you know why.

Over the last few months we have been working to get our training validated to help meet your requirements for DOD training. To that end we are proud to announce that we have achieved certification in CNSS 4012 for the ISAM. This means people that successfully complete the ISAM can be certified for CNSS 4012 and that maps to the DOD 8570.1-M as IASE II/III.

Some comments received from the reviewers:

*The courseware supports activities in the PCI, HIPPA & DoD environments. Some unique items of this course include the fact that Security Horizon, Inc. hosts a website that provides the public and their student populous access to numerous white papers discussing the basics of Computer Forensics, Incident Response, Network Address Translation (NAT), Understanding PKI and IP Packets as well as quarterly Security Journals in which many additional articles are featured. This is a benefit which can be used for knowledge sharing, research or could also be used as a mechanism for earning continuing education units (CEU's) to help maintain government sanctioned certifications – so I view this as a plus.*

*Overall, I think there is some great coursework and the contents of the courseware presented were very comprehensive. The training institution could potentially map to additional standards if desired.*

*Congratulations on a job well done.*

One other interesting fact is the student review posted about the ISAM:

<http://www.ethicalhacker.net/content/view/359/2/>

Currently we have scheduled:

- ISAM Myrtle Beach, SC, June 2-4, 2011, Hosted by The Training, Co
- ISRM Myrtle Beach, SC, June 1-4, 2011, Hosted by The Training, Co
- ISRM Oslo, Norway, May 3-6 2011, Hosted by mnemonic

If you are interested in having a private class at your location or ours, just let us know.

Thanks Everybody,
