## TRAINING

## WHAT DOES SECURITY HORIZON OFFER?

We offer a broad array of security training with courses that range from general security awareness to a specialized digital forensic class.

We are especially proud of the NSA IAM and IEM, offered as a result of our partnership with the National Security Agency. These courses teach detailed and systematic methods for examining and addressing an organization's information security vulnerabilities. These methodologies were developed by experienced NSA assessors and result in NSA certification for eligible students. In addition, Security Horizon students benefit from *learning directly from the IEM course co-authors* as well as receiving free software products and publications from Security Horizon partners.

We also design training solutions customized to an organization's specific needs and goals.

Additional information is available on our website or by contacting us at [info@securityhorizon.com](mailto:info@securityhorizon.com).
